

## Basic Information

---

### Grant title

Safe water Save the Children in Northeast Thailand by Village Cultures

### Type of Project

#### Humanitarian Project

Address community needs and produce sustainable, measurable outcomes

### Primary Contacts

Name	Club	District	Sponsor	Role
Sangtiwa Tong-U-Chang	Nongkhai	3340	District	Host
Chikako Demura	Sapporo-North	2510	District	International

## Committee Members

---

### Host committee

Name	Club	District	Role
Vivat Pipatchaisiri	Magkang	3340	Secondary Contact
Dutrudee Ongviseth	Nongkhai	3340	Secondary Contact

### International committee

Name	Club	District	Role
Masaki Taniguchi	Takikawa	2510	Secondary Contact International
Dainin Habu	Sapporo-Konan	2510	Secondary Contact International

### Do any of these committee members have potential conflicts of interest?

No

# Project Overview

---

## **Tell us a little about your project. What are the main objectives of the project, and who will benefit from it?**

Basically our idea and goal by the project is "Through the experience of old projects make systematic new projects"

And we do believe,by this new projects also works for old projects.

We've done many water projects for children for 18 years in Northeast area in Thailand.

And we still have been keep making sure the situations of the projects.

Some are still doing well,many of the projects have subjects or problems.

Through this experiences, we found that if we depend on person's ability too much, it's difficult to keep doing well.

For example, once local person in charge is changed, many of the cases it's difficult to keep going the projects are doing well.

That's why we are trying to have new project as systematically.

We are trying to provide international level of health education for kids and we are also trying to sustain the project by local village cultures.

It might be sound irony however we found it's needed for projects's independence.

We'll provide international WASH program to rural area's kids.

We'll make a systems making and selling recycle soaps.

And the income by it spends for the maintainance of the clean water systems.

Those new system and new educational program by new program are also used for old projects which have subjects and problems.

For the WASH program we are planing on making Movie or short film as show cases for next generation group of community members to learn and benefit from our WASH program for children's health and sanitation.

Making Recycle soaps, some materials are each village's traditonal local herbs or herds.

Combination of the new technology and trational cultures are also our key words.Making a Recycle soap is very simple things however through the experience,they look over their own traditons and cultures.

We also believe,by this Recycle soaps they could take back their pride.

That's our clear goal for this project.

By the area survey,we found badly 8 elementary schools in Buang Gan province doesn't have clean water with filtration systems.

2011/March/11 Buang Gan province was independed as a new province of Thailand.

According to the subdivision,the situation of the new area was more detailed and those kind of schools's probrem is getting more cleared.

And we are plannning to make those 8 schools to be model schools of the new Water projects in Northeast Thailand where the new Water projects will include relevant training to support Water project in long term.

To provide children and villagers from rural areas in Northeast area in Thailand hygienically clean water together with appropriative filtration systems. Hygienically clean water with filtration system for the purpose of drinking and daily usage will be provided for children from schools and villages near and around the selected villages within North East area in Thailand.

North East Thailand where poverty is still a main obstacle in lives, we also found that water system is still insufficiently supplied which leads us to a problem of water scarcity and unclean drinking water for people in rural parts of Thailand. These particular problems have direct effect on children's health where the part of their growing up involves around food and water poisoning where children ending up with diseases caused mainly by drinking dirty water and using unfiltered water to live their lives.

By the area survey,we found badly 8 elementary schools in Buang Gan province doesn't have clean water with filtration systems.

2011/March/11 Buang Gan province was independed as Thailand's new province.

According to the subdivision,the situasion of the area was more detailed and those kind of schools's probrem is getting more cleared.

Providing clean water with filtration system to schools in and all around Buang Gan province, children and villagers within areas could greatly benefit from this project with supply of hygienically clean and filtered water as a crucial part of their lives. Because of poverty, most of families in the area have problems getting clean drinking water, resulting in unhealthy living conditions especially for children and older generation.

And one more important for our goal are radicating health educaion for kids and the way of maintainance of clean water systems included independent financial by the projects.

We used to have same kind of clean water projects by MG in Northeast area.

Many clean water projects was successfully done,however we still have subjects about maintainance and kids education of hygiene.

In fact we've keep having Maintainance clean water projects at the schools we used to have the projects and fixing the systems by WCS projects.

But this maintenance project taught us we need to have this Global grant project to make those old projects, those villages and schools independent.

Even in our reserch,we have huge number of beneficiary by WASH training and training of the way of maintainance of clean water system included the way to get income for the maintainance by this projects are huge.

And by the locaion,Buang Gan province especailly those 8 schools have underprivilege students from Laos and Vietname.

We are planning to make video movie about WASH program and send it to the schools in their home countries too.

The students in Laos and Vietname are also our new targets for this projects.

## Areas of Focus

---

### **Which area of focus will this project support?**

Water, sanitation, and hygiene

## Measuring Success

---

Water, sanitation, and hygiene

### **Which goals will your activity support?**

Facilitating universal and equitable access to safe and affordable drinking water; Improving community hygiene knowledge, behaviors, and practices that help prevent the spread of disease; Funding graduate scholarships for career-minded professionals related to water, sanitation, and hygiene

**How will you measure your project's impact? You need to include at least one standardized measure from the drop-down menu as part of your application.**

Measure	Collection Method	Frequency	Beneficiaries
Number of people with access to improved sources of drinking water	Direct observation	Every month	100-499
Number of people with access to improved sanitation facilities	Direct observation	Every six months	100-499
Number of communities utilizing a tariff/usage fee structure	Direct observation	Every six months	100-499
Number of individuals trained	Direct observation	Every three months	1000-2499

### Do you know who will collect information for monitoring and evaluation?

Yes

#### Name of Individual or Organization

Buang Gan Municipality included public health office

#### Briefly explain why this person or organization is qualified for this task.

Besides RID3340, Buang Gan Municipality will be mainly responsible for all steps required for each evaluation process therefore monitoring and collecting evaluation results of kids health educaions and maintainance situations by 8 schools.

This is crucial for continuous data collection and future reports. Initially school principals will gather information according to given measuring instructions and collaborate such information with local authorities in order to give full reports to Mayor of Buang Gan Municipality included public health office.

And Recycle soaps by the projects, Chamber of Commerce evaluates the soaps based on point of One Village One Product ideas.

By the cooperation of the organisations, 8 schools will compete in a good way.

It makes raising bottom for whole areas quality of projects and works for sustainable projects.

## Location and Dates

---

Humanitarian Project

#### Where will your project take place?

##### City or town

In and all around Northeast Thailand

##### Country

Thailand

#### When will your project take place?

2019-06-30 to 2021-06-30

##### Province or state

In and all around Northeast Thailand

# Participants

---

## Cooperating Organizations (Optional)

Name	Website	Location
Nongkhai chamber of commerce	<a href="https://www.chamber-commerce.net/dir/4129/Nongkhai-Chamber-of-Commerce-in-Nongkhai">https://www.chamber-commerce.net/dir/4129/Nongkhai-Chamber-of-Commerce-in-Nongkhai</a>	82 Mittraparp Rd. Tambol Phochai Nongkhai Thailand

## Supporting Documents

- MOU.pdf

## Do any committee members have a potential conflict of interest related to a cooperating organization?

No

## Why did you choose to partner with this organization and what will its role be?

Committee members of Chamber of Commerce of Nongkhai Buang Gan from the OVOP department (OVOP: One Village One Product) who specialize in businesses and marketing for hand-made products and rafts will provide training on Recycled soap making classes.

Selling the Recycle soaps, the income will spend to maintainance of clean water systems.

Cooperate with local chamber of commerce is very important to make sustainable projects.

## Partners (Optional)

### List any other partners that will participate in this project.

Buang Gan Municipality included public health office

## Rotarian Participants

### Describe the role that host Rotarians will have in this project.

-To manage the whole project.

-To coordinate between local government, schools and Chamber of commerce and Rorary.

### Describe the role that international Rotarians will have in this project.

-Consultation of project formation and budget

-Consultation and Brainstorming of project sustainability

-Provide advice and problem solving solution needed during project

-Attend Handover ceremony

-Publicity

# Budget

## What local currency are you using in your project's budget?

The currency you select should be what you use for a majority of the project's expenses.

<b>Local Currency</b>	<b>U.S. dollar (USD) exchange rate</b>	<b>Currency Set On</b>
THB	32	01/02/2019

## What is the budget for this grant?

List each item in your project's budget. Remember that the project's total budget must equal its total funding, which will be calculated in step 9. Every global grant includes a match of at least \$15,000 from The Rotary Foundation's World Fund. Project budgets, including the World Fund match, must be at least \$30,000.

#	Category	Description	Supplier	Cost in THB	Cost in USD
1	Equipment	Clean Water Filtration System for Ban Na Wang Sai Pan Ya School	TANAGORN CO., LTD.	183900	5747
2	Equipment	Clean Water Filtration System for Ban Huey Rue School	TANAGORN CO., LTD.	183900	5747
3	Equipment	Clean Water Filtration System for Ban Som Kok School	TANAGORN CO., LTD.	183900	5747
4	Equipment	Clean Water Filtration System for Ban Nong Toom Wittaya School	TANAGORN CO., LTD.	183900	5747
5	Equipment	Clean Water Filtration System for Ban Ta Kok Tong	TANAGORN CO., LTD.	183900	5747

## Funding

Tell us about the funding you've secured for your project. We'll use the information you enter here to calculate your maximum possible funding match from the World Fund.

#	Source	Details	Amount (USD)	Support*	Total
1	Cash from Club	Nongkhai	1,000.00	50.00	1,050.00
2	District Designated Fund (DDF)	3340	1,000.00	0.00	1,000.00
3	District Designated Fund (DDF)	2510	21,088.00	0.00	21,088.00
4	Cash from Club	Bangkok Klongtoey	200.00	10.00	210.00

\*Whenever cash is contributed to the Foundation to help fund a global grant project, an additional 5 percent is applied to help cover the cost of processing these funds. Clubs and districts can receive Paul Harris Fellow recognition points for the additional expense.

### How much World Fund money would you like to use on this project?

You may request up to 22,688.00 USD from the World Fund.

22688

### Funding Summary

<b>DDF contributions:</b>	22,088.00
<b>Cash contributions:</b>	1,200.00
<b>Financing subtotal (matched contributions + World Fund):</b>	45,976.00
<b>Total funding:</b>	45,976.00
<b>Total budget:</b>	45,976.00

## Sustainability

### Humanitarian Projects

#### Project planning

#### Describe the community needs that your project will address.

This Global Grant will eventually supply sufficient amount of clean water and appropriate filtration systems to schools, students, children and villagers from selected rural areas and to those who live in and around the selected areas where water and clean water system is highly a scarcity.

Due to the lack and insufficient supply of hygienically clean drinking water, children and villagers suffer from sicknesses and diseases caused by consumption of dirty and/or contaminated water. Schools and villages from rural areas in Northeast Thailand need to purchase drinking water from local businesses which can be costly to their already low income earnings as such purchase will have to be made daily. Therefore schools and people in the community tend to rely on rain water from rainy season which may or may not be sufficient all year round since rainy season in Thailand only lasts 4 months or less now that we are facing problems of Global Warming which effect rainy season's normal accuracy and its duration. Therefore, resulting in the

inevitable necessity to buy life water for most families and the schools also have financially difficult problems.

And one more important for our goal are building health education for kids and the way of maintenance of clean water systems included independent financial by the projects all around Northeast Thailand. Many schools in the area, Rotary and other organization had had clean water projects by such as Matching Grant.

And many of them still have subjects building kids education of hygiene and the way of maintenance of clean water systems included independent financial.

According to our research, some school can't use the clean water systems by those reason.

### **How did your project team identify these needs?**

According to intensive project surveys, we found that 8 schools within Amphur Pakkard within Buang Gan province in Northeast are in fact in critical needs for help from our project. Project surveys have been conducted for primary school students from age 7-12 years old and secondary school students from age 12-16 years old and as well as for the villagers who live all around selected schools.

This Global Grant project will provide solution in solving lack of clean drinking water to approximately 1,000 students from 8 schools and minimum estimated number of 4,000 villagers from rural areas of Amphur Pakkard and villages within Buang Gan province Northeast , Thailand.

During the research, we also found And one more important for our goal are Training and the way of maintenance of clean water systems by the projects.

We used to have same kind of clean water projects by MG.

Many clean water projects was successfully done, however we still have subjects about maintenance and kids education of hygiene.

In fact we've keep having Maintenance clean water projects at the schools we used to have the projects and fixing the systems by WCS projects.

But this maintenance project taught us we need to have this Global grant project to make those old projects, those villages and schools independent.

Even in our research, we have huge number of beneficiary by WASH training and training of the way of maintenance of clean water system included the way to get income for the maintenance by this projects are huge.

And by the location, Buang Gan province especially those 8 schools have underprivileged students from Laos and Vietnam.

We are planning to make video movie about WASH program and send it to the schools in their home countries too.

The students in Laos and Vietnam are also our target.

We have conducted interviews with six local organizations as names and contacts are listed below:

1. Chamber of Commerce of Buang Gan (Non-Governmental Organization) Address: [www.bkchamber.com](http://www.bkchamber.com)
2. Buang Gan Municipality included public health office
3. Provincial Treasury of Buang Gan (Governmental Organization)  
Address: [www.cgd.go.th](http://www.cgd.go.th)>bgk
4. Provincial Commerce of Buang Gan (Governmental Organization)  
Address: [www.dbd.go.th](http://www.dbd.go.th)>bungkan
5. Chamber of Commerce of Nongkhai (Non-Governmental Organization)  
Address: <https://m.facebook.com>>nkechamber
6. Provincial Treasury of Nongkhai (Governmental Organization)  
Address: [www.cgd.go.th](http://www.cgd.go.th)>nki
7. Provincial Commerce of Nongkhai (Governmental Organization)  
Address: [www.dbd.go.th](http://www.dbd.go.th)>nki

According to several interview sessions with HEADS OF PROVINCIAL COMMERCE OF BUANG GAN-NONGKHAI HEADS OF PROVINCIAL TREASURY OF BUANG GAN-NONGKHAI we found that families within our selected areas in Buang Gan; Amphur Pakkad, Amphur Se Ga and Amphur Porncharoen have the lowest income earnings in recording systems and statistics. The monthly income of each family member from these rural areas is listed to be approximately 2,000 BAHT (Approximately 60 US DOLLARS which is approximately 24,000 BAHT Approximately 700 US DOLLARS per annual per person)

In the North-East area of Thailand, about 80 per cent of the population comes from farming and agriculture backgrounds, these selected three areas in particular, where younger population tends to seek jobs or attempt to survive their livings in bigger cities such as Bangkok and industrial area such as Korat which makes it rather difficult or almost impossible to afford having their children living with them in bigger cities where incomes and earnings will not suffice. Inevitably, the younger generation from first borns onward will be left behind at home for their grandparents to take care of, while parents are struggling for more financial supports by working within the big cities.

(Sources of updated data and information: CHAMBER OF COMMERCE OF BUANG GAN/CHAMBER OF COMMERCE OF NONGKHAI)

### **How were members of the benefiting community involved in finding solutions?**

We had meetings with local schools the target for clean water systems.

And we also had meeting some schools we had clean water projects such as by MG.

And the projects at the schools mostly more than 10 years ago.

And we found future subjects of the new Global Grant projects by the situations of old projects.

Local authorities such as sub-provincial municipality also play significant role in helping the clarity of needs for severe lack of clean drinking water for schools in the community. These local authorities will help in organising long-term maintenance plans and management of this Global Grant project.

The benefiting communities assistance is highly crucial. School principals, teachers and school officials from each particular school help in forming local teams which include the Head of each village and parents to assist Rotarians during project surveys. Each school team consists of Principal, teachers, students, parents, Heads of villages and villagers. These assigned local committee members will serve as project management team from the beginning of this global grant project, these project management team members are an integral part of need identification, research and data collection, identifying needs for necessary and hands on training to assist the project outcomes and long-term maintenance and future problem solving solutions.

### **How were community members involved in planning the project?**

We had meetings with local schools the target for clean water systems.

And we also had meeting some schools we had clean water projects such as by MG.

And the projects at the schools mostly more than 10 years ago.

And we found future subjects of the new Global Grant projects by the old projects.

Local authorities such as sub-provincial municipality also play significant role in helping the clarity of needs for severe lack of clean drinking water for schools in the community. These local authorities will help in organising long-term maintenance plans and management of this Global Grant project.

### **Project implementation**

#### **Summarize each step of your project's implementation.**

Do not include sensitive personal data, such as government ID numbers, religion, race, health information, etc. If you include personal data, you are responsible for informing those whose personal data is included that you are providing it to Rotary and that it will be processed in accordance with Rotary's [Privacy Policy](#).

#	Activity	Duration
1	Initiating project surveys	30 days
2	Formation of Project teams	30 days
3	Conducting intensive project research	30 days
4	Water filtration system installations and structures	60 days
5	Clean water project monitoring and evaluation	12 months

**Will you work in coordination with any related initiatives in the community?**

Yes

**Briefly describe the other initiatives and how they relate to this project.**

- Assisting Rotarians with initiating project researches and surveys.
- Initiating needs, objectives, goals and process to fulfil the gathered needs.
- Assisting Rotarians with local problem with water systems and problems caused by lack of clean water systems
- Supporting the trainings in the project.(making Recycle soaps,WASH programs,maintainance of the systems)
- Provide immediate assistance and problem solving solutions in local levels when schools and villages seek or need help.

**Please describe the training, community outreach, or educational programs this project will include.**

Teachers learn knowledge of WASH program and Sanitation.  
The objectives of this training and the training curriculum are as followed:

1. Learning how important Sanitation for children.
2. Learning how important the WASH program for children.
3. Learning how effect Sanitary education for children’s health.
4. Learning how effect WASH program for children’s health.

Making handbooks about the WAS and Sanitation for students and demonstration of how to teach the “WASH” by the handbooks and movies to the students.

This global grant project training also The objectives of this training and the training curriculum are as followed:

1. Making handbooks and Movies: to explain how important WAS and Sanitation.
2. Making handbooks Movies: to explain the way of “WASH”.
3. Reviewing the detail of handbooks and Movies.
4. Demonstrating of how to teach the WAS by the handbooks and Movies to students.

On the job training of making recycled soaps class to achieve our goal

The objectives of this training and the training curriculum are as followed:

- 1.Making samples of message card.
- It will put into the package of Recycled soaps.

It has 3 important messages as below,

- How important WASH for students.
- The soap was made from the waste of used soaps by local hotels and how important to work in the community about the Environmental protection.
- The maintenance of the clean water systems will be covered by the profit by the soaps.

The community members gather local expertise and know-hows of installation and maintenance of filtration equipments. Therefore each school will have the help from local technicians ready for the given tasks. Those particular tasks will include knowing how to operate filtration systems and how to keep the filtration systems well-functioned at all times. Teachers, students and village representatives who have been assigned for these tasks will have to undergo training from the start as well as during the progress of this global grant project in order to ensure the ability to maintain excellent hygiene and cleanliness of clean water filtration systems.

Assigned team members consist of school principals, teachers, student representatives and village representatives. These members will be responsible for overall project maintenance and will handover reports of water filtration weekly usage and problems that occur during using clean water filtration systems.

Clean water project training will also include post installation process of monthly cleaning process of equipments such as filters, tubes, and stainless steel tanks and system. Participants of monthly cleaning process of filtration system consist of student representatives assigned from schools and villager representatives from villages. By having representatives present at training, existing problems will immediately be informed and solutions to those problems will be fixed correctly and quickly.

Need identification, project objectives and process to achieve those objectives derive from working together with school head masters, teachers, officers, students and parents. With their enthusiastic participations and supports, Rotarians are able to gather necessary details in forming the project needs, objectives, process and plans in which this global grant project will progress effectively and efficiently. Many visits and meetings with the mentioned community members are inevitably crucial to help us with correct training plans in which the community will need to achieve the sustainability of project which will be granted to them.

Assigned teams for each school will conduct the sanitation trainings, home-made soap classes and clean water maintenance monitoring and evaluation on a weekly process and will handover a monthly reports to Rotary after water filtration systems have been completely installed and in use. Monitoring and evaluating clean water project will include help and cooperation from villagers who will have access to supply of hygienically clean water from Rotary clean water project. People from nearby area of schools will be able to get their daily consumption of clean water and that will naturally help to give them basic lives needed as human being. After this project is done, those each 8 schools will be nominated as a "Model school of Rotary water project in Northeast" and other schools come over and learn the systems.

### **How were these needs identified?**

We've been visiting the schools used to had projects such as Water projects even old projects to see the situation of projects ,schools and villages in Northeast. We also have meetings with teachers and villagers as well.

Because of the visiting and meeting, we found a lot of necessity.

### **What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?**

In order to reach the sustainability of this Global Grant, it is highly crucial that people from each living community play their part of involvements towards the project. Local businesses devote their support for this Global Grant Project to reach its focus of maintaining the functionality of given equipments. By getting local businesses to involve in our project from the school's Recycled soap making program, the community will achieve the on-going assistance in supply such as monetary compensation to help maintain the hygiene and cleanliness of water filtration systems.

For the final training, we'll invite representative teachers from all the provinces in Northeast Thailand as trainees.

Because schools in whole area Northeast have been having similar subjects. We have 27 provinces in the area and local Rotary clubs will pick target schools. Representative 3 trainee teachers from each provinces will be invited to each school in Buang Gan province and will have the Soap making training and WASH training as OJT. The Representative 3 trainees will get the recycle soaps which is based on One village One product as insentives. We will encourage to the representative teachers to make their own specail soaps to use local herbs ,local fruits and local specialty by the training.

**List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.**

Buang Gan municipality included health public , Heads of villages and local communities/authorities will help provide long-term maintenance and responsibilities for this global grant. It is the main objective of this project to gather local involvements to ensure the project sustainability, hence, implementing sense of ownership for locals such as teachers, students and villagers from their continuous participation towards the project would be highly necessary. This will strengthen the capability and ability of local communities to develop consistency of project maintenance and sustainability of our clean water project filtrations and sanitation systems after this global grant project has been funded.

In order to achieve long-term sustainability of this project, Buang Gan municipality, Heads of villages and local communities/authorities will take part in training of clean water filtration maintenance. Supporting training programs for participants and representatives will be enhanced to reach communities' awareness of the benefits of hygiene, water sanitation and more importantly people in communities will learn the benefits of value of water and how to use it wisely.

Supports from Chamber of Commerce Nongkhai-Buang Gan and local businesses.

## Budget

**Will you purchase budget items from local vendors?**

Yes

**Explain the process you used to select vendors.**

- Sourcing reliable recommendations of local vendors.
- Selection of appropriate vendors and specifications of quality, prices and post purchase services.
- Selection of vendors will be done through competitive biddings.

**Did you use competitive bidding to select vendors?**

Yes

**Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.**

Initially, operations and maintenance management for clean water equipments and filtration systems will be provided by selected vendors and local technicians. Training of daily operations and regular management of maintenance of clean water filtration system will also be given to teachers, students, janitors, and villagers.

Selected representatives from schools and villages for Self-sustainabilty project will undergo intensive trainings provided by selected supplier and local technicians for clean water project. Trainings will include the improvisation of water filtration systems from installation, operation and maintenance of equipments and functions where thorough understandings of water filtration systems will be outlined and handling guidelines will be allocated in training sessions for each school.

**Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?**

Community members including teachers, students and villagers will obtain their own incentives for changing filtration filters and replacement parts that might occur during usage of equipments.

Each school will implement their own fund raising project which will assist and prolong regularity and maintenance of clean water filtration system. The fund raising project refers to financial support from Recycled soap making program and activities to support long term maintenance of the given project. Together with the incentives and financial support from the community who has access to filtered clean water to use at home by paying minimal amount of money as contribution to Clean Water Project to schools, resulting in continuous increase of project life span and its filtration systems and equipments from changing filters on the regular basis for instance.

**If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?**

Yes

**Please explain.**

Clean water filtration systems and the equipments are within easy and flexible reach locally. This global grant project seeks reliable advices from successfully completed clean water projects from Rotary club of Korat from RID 3340 and Rotary club of Bangkok Klongtoey from RID 3350. The standards of clean water filtration system and filters are those recommended by former clean water project providers from RID 3340 and RID 3350 who have extended experiences with clean water projects.

**After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.**

Clean water project and all filtration equipments will belong to each schools and living communities from Amphur Pakkard and villages within Buang Gan province.

Funding

**Does your project involve microcredit activities?**

n/a

**Have you found a local funding source to sustain project outcomes for the long term?**

Yes

**Please describe this funding source.**

Fund raising project for Clean Water Project Maintenance of each school: Funding of long-term and continuous financial support of filters and necessary parts of equipments as part of Self-Sustainability Project from Recycled soap making program and activities.

-Supports from Municipality and Local authorities project involvement and assistance for long-term financial capability for clean water project maintenance such as changing filters and other necessary parts of equipments of water filtration systems.

**Will any part of the project generate income for ongoing project funding? If yes, please explain.**

According to the Self sustainability project, Income for ongoing project funding from school's Recycled soap making activity and program will provide continuous support for this global grant after the project has been given to the schools. Minimal incentives will be acquired through this school project in order to replace parts and filters to maintain well-function and usage of the given equipments.

Community members including teachers, students and villagers will obtain their own incentives for changing filtration filters and replacement parts that might occur during usage of equipments of this global grant project.

Each school will implement their own fund raising activities which will assist and prolong regularity in maintenance of clean water filtration system. The fund raising activities refer to financial support from school's Recycled soap making program and from everyone who has access to filtered clean water to use at home by paying minimal amount of money as contribution to Rotary Clean Water Project to schools, resulting in continuous increase of project life span and its filtration systems and equipments such as changing filters on a regular basis for instance. By having local communities involve in generating income for clean water filtration systems, this global grant project will be providing equitable community access to safe water and improvement of sanitation, health and hygiene of the overall communities.

For continuation and ongoing project funding, representatives from school and communities will be selected and acted as accounting department where incentives as a part of community contribution from parents, students, local communities and families will be collected, handled and reported to school principals, heads of communities, local authorities and RID-3340 for final reporting progress and process. Costs of equipments such as regular change of filters will be covered within possible system and reach.

Regularity of change of filters will result in well-functioned of Clean water filtration systems as well as good quality of hygienically clean drinking water, hence, sanitation for the children and living communities in Buang Gan province can be achieved in the long-term process.

## Authorizations

#### **Legal agreement**

Global Grant Agreement

I confirm and agree to the following:

1. All information contained in this application is, to the best of our knowledge, true and accurate.
2. We have read the Terms and Conditions for Rotary Foundation District Grants and Global Grants ("Terms and Conditions") and will adhere to all policies therein.
3. The grant sponsors ("Sponsors") shall defend, indemnify, and hold harmless Rotary International (RI) and The Rotary Foundation (TRF), including their directors, trustees, officers, committees, employees, agents, associate foundations and representatives (collectively "RI/TRF"), from and against all claims, including but not limited to claims of subrogation, demands, actions, damages, losses, costs, liabilities, expenses (including reasonable attorney's fees and other legal expenses), awards, judgments, and fines asserted against or recovered from RI/TRF arising out of any act, conduct, omission, negligence, misconduct, or unlawful act (or act contrary to any applicable governmental order or regulation) resulting directly or indirectly from a Sponsor's and/or participant's involvement in grant-funded activities, including all travel related to the grant.
4. The failure of the parties to comply with the terms of this Agreement due to an act of God, strike, war, fire, riot, civil unrest, hurricane, earthquake, or other natural disasters, acts of public enemies, curtailment of transportation facilities, political upheavals, acts of terrorism, or any similar cause beyond the control of the parties shall not be deemed a breach of this Agreement. In such an event, the Agreement shall be deemed terminated and the Sponsors shall refund all unexpended global grant funds within 30 days of termination.
5. TRF's entire responsibility is expressly limited to payment of the total financing amount. TRF does not assume any further responsibility in connection with this grant.

6. TRF reserves the right to cancel the grant and/or this Agreement without notice upon the failure of either or both of the Sponsors to abide by the terms set forth in this Agreement and the Terms and Conditions. Upon cancellation, TRF shall be entitled to a refund of any global grant funds, including any interest earned, that have not been expended.
7. The laws of the State of Illinois, USA, without reference to its conflicts of laws principles, shall govern all matters arising out of or relating to this Agreement, including, without limitation, its interpretation, construction, performance, and enforcement.
8. Any legal action brought by either party against the other party arising out of or relating to this Agreement must be brought in either, the Circuit Court of Cook County, State of Illinois, USA or the Federal District Court for the Northern District of Illinois, USA. Each party consents to the exclusive jurisdiction of these courts, and their respective appellate courts for the purpose of such actions. Nothing herein prohibits a party that obtains a judgment in either of the designated courts from enforcing the judgment in any other court. Notwithstanding the foregoing, TRF may also bring legal action against Sponsors and/or individuals traveling on grant funds in any court with jurisdiction over them.
9. This Agreement binds and benefits the parties and their respective administrators, legal representatives, and permitted successors and assigns.
10. If any provision of this Agreement is determined to be illegal, invalid or unenforceable, the remaining provisions of this Agreement shall remain in full force and effect.
11. Sponsors may not assign any of its rights under this Agreement except with the prior written consent of TRF. Sponsors may not delegate any performance under this Agreement without the prior written consent of TRF. Any purported assignment of a Sponsor's rights or delegation of performance without TRF's prior written consent is void.
12. TRF may assign some or all of its rights under this Agreement to an associate foundation of TRF. TRF may delegate any performance under this Agreement to an associate foundation. Any other purported assignment of TRF's rights or delegation of performance without the Sponsors' prior written consent is void.
13. Sponsors will comply with all economic and trade sanctions, including those implemented by the Office of Foreign Assets Control (OFAC) of the United States Department of Treasury, and will ensure that they do not support or promote violence, terrorist activity or related training, or money laundering.
14. This Agreement constitutes the final agreement between the parties. No amendment or waiver of any provision of this Agreement shall be effective unless it is in the form of a writing signed by the parties.
15. Rotary International (RI) and TRF may use information contained in this application and subsequent reports to promote the activities by various means such as The Rotarian, Rotary Leader, rotary.org, etc. Unless indicated otherwise in writing, by submission of the photos, the parties hereby grant to RI and TRF the worldwide right to publish and use the photos, including but not limited to, in RI and TRF publications, advertisements, and Web sites and on social media channels and to license use to others, including, but not limited to, media outlets and its partners and through RI's online image database, for the purposes of promoting Rotary. By submitting the photos, the parties represent and warrant that all persons appearing in the photos have given their unrestricted written consent to use their likenesses and to license use to third parties.
16. The Sponsors agree to share information on best practices when asked, and TRF may provide their contact information to other Rotarians who may wish advice on implementing similar activities.
17. The Sponsors will ensure that all individuals traveling on grant funds have been informed of the travel policies stated in the Terms and Conditions and have been made aware that they are responsible for obtaining travel insurance.

## Primary contact authorizations

### Application Authorization

By submitting this global grant application, we agree to the following:

1. All information contained in this application is, to the best of our knowledge, true and accurate, and we intend to implement the activities as presented in this application.
2. The club/district agrees to undertake these activities as a club/district.
3. We will ensure all cash contributions (as detailed in the grant financing) will be forwarded to The Rotary Foundation (TRF) or sent directly to the global grant bank account after Trustee approval of the grant.
4. Rotary International (RI) and TRF may use information contained in this application to promote the activities by various means such as The Rotarian, the RI international convention, RVM: The Rotarian Video Magazine, etc.
5. We agree to share information on best practices when asked, and TRF may provide our contact information to other Rotarians who may wish advice on implementing similar activities.
6. To the best of our knowledge and belief, except as disclosed herewith, neither we nor any person with whom we have or had a personal or business relationship are engaged, or intend to engage, in benefiting from TRF grant funds or have any interest that may represent a potential competing or conflicting interest. A conflict of interest is defined as a situation in which a Rotarian, in relationship to an outside organization, is in a position to influence the spending of TRF grant funds, or influence decisions in ways that could lead directly or indirectly to financial gain for the Rotarian, a business colleague, or his or her family, or give improper advantage to others to the detriment of TRF.
